

Compound Adjectives

Compound adjectives are the unsung heroes that add color and precision to our expressions. In this handy list, you'll discover the magic of hyphenated word duos that can transform your everyday language into a tapestry of vivid imagery and exactness.

Before we jump into our comprehensive list, let's get a quick grasp on what compound adjectives really are and how they can transform your communication.

What are Compound Adjectives?

Compound adjectives are adjectives that are made up of two or more words usually combined with a hyphen to act as a single idea to modify a noun. These two words work together to function like any other adjective, describing or giving more information about a noun.

The hyphen is an important little dash that links the words together to make sure the person reading knows that the words are connected in meaning.

For example, in the term "high-speed chase," "high-speed" is a compound adjective that tells you what kind of chase it is—it's not just any chase; it's one with high speed. Similarly, a "full-time job" isn't just any job, it's a job that's full-time.

How Compound Adjectives are Formed?

Compound adjectives can be formed from combinations of different types of words, such as:

- An adjective and a noun (e.g., "bitter-sweet")
- A noun and a past participle (e.g., "sugar-coated")
- A noun and an adjective (e.g., "ice-cold")
- An adverb and a past participle (e.g., "well-known")
- A verb and a preposition (e.g., "run-down")

Compound Adjectives List

Here is a list of all popular compound adjectives;

1. Open-minded
